Research Page — Content Requirement Sheet

Based on the approved low-fidelity wireframe: research.html

Prepared for: Uva Wellassa University — Faculty of Management | Document Date: 30 June 2026

The Research Page (titled “Research & Publication”) covers the Faculty's research overview, publication repository, faculty journal, conferences, the ENM Research Circle, undergraduate research, and the Ethics Review Committee. This sheet lists every piece of real content needed to replace the wireframe's placeholder content, organised into the page's 7-tab sticky navigation. Per your instruction, the footer is not included in this document (the Contact Strip immediately above the footer is kept, as it is a separate content block).

Items highlighted in red below need particular attention — mostly because author/supervisor names, DOIs and similar reference details are filled with generic placeholders that need real data before this page can publish real research output. Image requirements are consolidated in a checklist at the end of this document.
